Senior Assistant Medical Officer:	Dr. M. E. O'Neill
Assistant County Medical Officers:	Dr. M. J. Hallinan Dr. J. B. McCaffry
Public Health Inspector :	Mr. R. D. Higgs

TO THE CHAIRMAN AND MEMBERS OF THE HEALTH COMMITTEE
KIVETON PARK RURAL DISTRICT COUNCIL

I have the honour to submit my Annual Report upon the health services of the district for the year ending 31st December, 1960.

More attention was given to the care of the elderly by strengthening the Home Help and Home Nursing Staffs. A new Chiropody Scheme dealt with 476 elderly people on 1,721 occasions during the year and the Rolleston Home with 44 places for old people was opened at Maltby.

The building of a new clinic at Dinnington was begun and the Church Trustees made two additional rooms available at the Kiveton Park Clinic.

Midwives were issued trilene apparatus to add to the analgesics available for women in labour and the period of stay of unmarried mothers in hostels was increased to 13 weeks.

A new training centre for 76 mentally handicapped children and adults was opened at Maltby after the summer vacation and a bus was provided for their conveyance to and from the Kiveton Park parishes.

Good progress was made in immunisations; the polio. figure climbed to 80% and vaccinations against diphtheria, whooping cough, tetanus, smallpox and tuberculosis all showed increases. The diseases causing most trouble in children were those for which no immunisations were available, i.e. measles, dysentery and respiratory infections.

Close liaison was kept with the Sheffield Hospitals through the Almoners, with the Rotherham Hospitals through weekly visits by the Health Visitors and with the Chest Clinics again through regular visiting.

Good progress was made in Slum Clearance by the Public Health Inspector; food hygiene showed an improvement, as proved by the absence of food poisoning and a steady betterment was clearly evident in sanitation and public cleansing.

Regretfully I have to report no change in the dental service for school children as it seems impossible to recruit dentists for this area on the present salary scale.

Again, I am unable to report any additional hospital beds for maternity cases or for expectant mothers with toxæmia.

I would like to comment upon the unfailing support of the Council for every move to benefit public health.

J. M. WATT
Medical Officer of Health

Population

The Registrar General's estimate of the population as at 30th June, 1960 was 19,190. The number of houses in the Rural area was 6,432. The estimated population for each parish is given below:-

PARISH	Population
Anston	3,444
Dinnington St. John's	7,034
Firbeck	257
Gildingwells	74
Hartill-with-Woodall	1,510
Letwell	96
Thorpe Salvin	360
Todwick	424
Wales	5,406
Woodsetts	585
Total -	19,190

Births

A total of 345 live births were notified to the Kiveton Park Rural District during 1960. This gave a crude rate of 17.9 per thousand and a comparable rate of 17.6 per thousand population.

The still-birth rate for the same period was 22.67 per thousand live and still-births; 8 still-births having been recorded.

PARISH DISTRIBUTION OF LIVE AND STILL-BIRTHS

Institutional Births

The hospitals and maternity homes ask for home circumstances reports on any cases applying for admission on which the hospital authority require further information. The patients' homes are visited by a Health Visitor who submits her reports to me; as a result, I can then give my recommendations to the hospital or maternity home on Form O.P.M.9.

Medical Aid (Divisional Table)

General practitioners were called to give medical aid at, or in connection with, domiciliary confinements in 127 instances, as analysed below:-

Pregnancy	...	...	30
Labour	...	...	64
Lying-in	...	...	17
Child	...	...	16

Dental Treatment of Expectant and Nursing Mothers

56 expectant and nursing mothers from the Kiveton Park Rural District received dental treatment under the West Riding scheme during 1960.

Ante-Natal Clinic

Attendances during 1960

CLINIC	No. of women who attended during year	Total number of attendances made	Attendances at Relaxation Class
Dinnington	30	142	118

Ophthalmia Neonatorum

No cases were notified from the Division during 1960.

Care of the Unmarried Mother and Her Child

38 cases were reported and dealt with in the Division during 1960.

9 mothers were under 20 years, 24 were 20 to 30 years and 5 were over 30 years.

22 were single women.

16 were married women, but had illegitimate pregnancies, 8 having had previous illegitimate pregnancies.

Settlement of these cases was as follows:-

- 25 mothers kept their babies.
- 2 babies were taken by grandparents.
- 5 babies were adopted.
- 2 babies were fostered.
- 3 cases were settled by marriage.
- 1 case was referred elsewhere for attention.

Pregnancy and child birth	-	2	2
Congenital malformations	1	-	1
Other defined or ill-defined causes ...	6	6	12
Motor vehicle accidents	4	-	4
All other accidents	4	3	7
Suicide	1	-	1
Totals -	<u>122</u>	<u>87</u>	<u>209</u>

The crude death-rate was 10.8 per thousand and the comparative death-rate was 12.42 per thousand.

Deaths (continued)

Infant Deaths

9 infants under one year of age died in 1960. The infant death-rate was 26 per thousand live births.

Particulars of infant deaths:-

<u>Birth Weight</u>	<u>Age at Death</u>	<u>Cause of Death</u>
4 lbs. 12 ozs.	20 minutes	Atelectasis. Spina bifida. (Lumbar meningocele). Prematurity.
6 lbs. 2 ozs.	6 hours	Atelectasis. Haemolytic disease of the newborn.
8 lbs. 4 ozs.	11 months	Asphyxia. Bronchial obstruction. Inhaled vomit.
3 lbs.	1 day	Prematurity (30 weeks gestation).
6 lbs. 5 ozs.	15 minutes	Cerebral haemorrhage due to tentorial tear.
6 lbs. 4 ozs.	1 month	Pulmonary and cerebral oedema due to Asphyxia. (Accidental).
5 lbs.	2 days	Cerebral anoxia. Intra-cranial haemorrhage. Birth injury (precipitate labour).
8 lbs.	21 days	Broncho-pneumonia. Tracheo-bronchitis.
6 lbs. 12 ozs.	4 days	Congenital heart disease.

Of the 9, only 1 lived more than four weeks. The neo-natal mortality rate was 20.29 per thousand live births.

Trend of Infant Deaths over the Past Ten Years:-

YEAR	Live Births	Infant Deaths	Infant Death Rates
1951	291	9	31
1952	314	9	28

Number of cases removed during the year	8	2	-	3
Number of cases on register at 31.12.60	61	28	12	7

The system for the examination of household contacts operates very efficiently in this Division. An Assistant Health Visitor visits the homes of all new cases, arranges for contacts to attend special sessions at the Chest Clinic, and herself attends one session weekly to assist with the clinic working, and to keep in close contact with the staff.

All school leavers are given Mantoux skin tests prior to B.C.G. vaccination and all positive reactions are referred to the Doncaster or Sheffield Radiography Units for large size chest X-rays.

In two schools, where members of the staff developed tuberculosis, all children were given Mantoux tests and chest X-rays arranged when these were positive.

The Rotherham Care and After-Care Committee continued to function successfully in 1960. It was necessary for the Committee to relinquish control of the three car parks in the Borough.

Domiciliary Visiting

1,811 effective visits plus 73 ineffective visits were made to households of tuberculosis patients during the year. From these visits, recommendations were made for cases to receive free milk. Where appropriate, application was made to the Tuberculosis Care Committee or the National Assistance Board for grants in cash or kind. Contacts were advised to attend the Chest Clinic when sent for, the Consultant Chest Physician having been supplied with a report on household circumstances and details of all contacts.

Extra Nourishment for Tuberculosis Cases:-

Number of patients in the Division receiving extra nourishment on 1st January, 1960	...	...	...	...	...	...	...	70
Number of patients granted extra nourishment during the year	...	...	...	...	...	...	...	16
Number of grants discontinued	...	...	...	...	...	...	...	32
Number of patients receiving extra nourishment on 31st December, 1960	...	...	...	...	...	...	...	54

Tuberculosis (Continued)

B.C.G. Vaccination

Contact Scheme - I am grateful to Dr. A. C. Morrison, the Consultant Chest Physician, for the following details of people vaccinated at the Chest Clinic as contacts of known cases of tuberculosis:-

(Divisional Table)

Percentage positive	...	...	...	...	...	18.3%

Vaccination

Number vaccinated	...	...	...	...	...	781
-------------------	-----	-----	-----	-----	-----	-----

Care and After-Care

The Rotherham Tuberculosis Care Committee continues to cover the divisional area, excluding Brampton Bierlow, which is included in the purview of the Mexborough Chest Clinic. A grant is made by the West Riding County Council each year and this, together with the proceeds from Christmas Seal sales, etc., help to provide essential help for more needy cases.

Mass Radiography Unit

The Mass Radiography Unit paid a visit to the Middleton Institute, Dinnington during 1960. I give below details of the survey carried out:-

	<u>Males</u>	<u>Females</u>	<u>Total</u>
Total attendances at the Institute	295	276	571
Passed on initial film	271	267	538
Recalled for large film	19	9	28
Failed to attend for recall large film	1	2	3
Passed on recall large film	5	6	11
Recalled for medical interview after large film	13	1	14
Recalled for medical interview without large film	5	-	5
Referred to chest clinic	6	1	7
Referred to own doctor	11	-	11
No action cases after interview	1	-	1

After making allowance for the absence of organised school parties, the attendance showed a drop of 600 general public compared to 1958. The Medical Director was of the opinion that the weather must have had quite a bearing on the attendance and he hoped for a return to more realistic figures the next time the Unit visited the Kiveton Park Rural District.

30 children attended for examination as mantoux positive reactors, all of whom were passed as clear of any infection.

Immunisation and Vaccination

(Kiveton Park Rural District)

<u>Diphtheria</u>	<u>Protective</u>	<u>Refresher</u>	<u>Total</u>

T. = Treatment

O. = Observation

Cleanliness of School Children

A total of 11,126 children were examined by Health Visitors and School Nurses at cleanliness surveys in schools. 507 were found to have head nits.

Diseases of the Skin

During the year, 10 children were treated for impetigo and 32 for other skin conditions.

Minor Ailments

1,127 pupils received treatment for minor ailments during 1960.

Convalescent Home Treatment

Arrangements were made for 12 children from the Division between the age of 5 and 12 years to go to the Filey Convalescent Home for periods of two weeks each.

Training Colleges - Medical Examination of Entrants

58 entrants for Training Colleges were examined and reports submitted to the appropriate colleges.

Children and Young Persons Act, 1933 (Employment of Children)

The above Act requires children to be medically examined to decide their fitness for employment in entertainments or newspaper deliveries, etc. 77 children were examined under these regulations.

Home Nursing Service

59,701 visits were made during 1960 by the Home Nurses, 29,279 of which were for injections only.

See following page for further details of the Home Nursing Service.

Convalescent Home Treatment

During the year, 3 cases were sent to Convalescent Homes on the family doctors' recommendations. 9 applications were withdrawn or cancelled.

Analysis of Cases:-

Female aged 65.	Depressed state following leucotomy.	Application cancelled. Reason not known.
Female aged 70.	Rheumatism.	Application cancelled. Patient refused treatment.
Female aged 77.	Depression following removal of cataract.	Application cancelled by patient. Reason not known.
Male aged 70.	Hemiplegia.	Patient too handicapped for Convalescent Home treatment.
Female aged 65.	Chronic Cholelithiasis.	Sent to Bridlington 17th June, 1960.
Female, aged 66.	Cholecystitis and bronchitis.	Sent to St. Annes 3rd June, 1960.
Female, aged 63.	Endogenous depression.	Cancelled. Patient admitted to Middlewood.
Male aged 63.	Confined to wheelchair.	Cancelled by patient. Unforeseen circumstances,
Female aged 75.	Partially blind diabetic.	Cancelled. Patient unfit. Two weeks stay in hospital arranged.
Female aged 50.	Convalescent after operation for Ileitis.	Cancelled. Went away privately.
Female aged 48.	Effects of spinal operation.	Sent to St. Annes 22nd April, 1960.
Female aged 50.	Debility and anaemia.	Application not proceeded with.

Children Neglected or Ill-Treated in Their Own Homes Prevention of Break-up of Families

In a large scattered division such as this, the district is partitioned in working areas for health visitors, probation officers, children's officers, education welfare officers and public health inspectors, so that it is an advantage to consider cases of child neglect from limited areas such as Maltby or Kiveton Park, so that all the social workers attending the meetings are familiar with all the cases on the agenda.

During the year, particular encouragement was given to the attendance of representatives of voluntary bodies concerned with the care of children.

The first meeting in February 1960 was held in the new Brinsworth Clinic when 22 members attended and 10 problem families were discussed.

The second meeting was held in October in Kiveton Park Council Chamber when there was an attendance of 26 members and 5 cases were reviewed.

Training Centre

Maltby Training Centre was opened on 10th March, 1958, in temporary premises at the Church Hall with 45 pupils and a Staff of 4. A great deal of good work was done under very difficult conditions, one of the main troubles being interference in the work due to the noise from adjoining classes.

There was a complete change on 29th August, 1960, when the new Centre on Cliff Hills was opened. Five classrooms, a large assembly hall and ample modern equipment became available, the number of trainees was increased to 73 (19 of whom were over 16 years of age), and the instructional staff was increased to 5.

The excellent attendance figures and the happy atmosphere which is always so noticeable in the Centre are proof of its appreciation by pupils and parents. A successful advance has certainly been made in Mental Welfare by the County Council in this Division.

Chiropody Service

This service commenced in March, 1960, and the table overleaf gives the statistical details.

Drainage and Sewerage

In January, an Inspector of the Ministry of Housing and Local Government held an inquiry into the joint scheme for the provision of sewers at Firbeck and Oldcotes and the improvement of the Hodsocks Disposal Works in the Worksop Rural District. The Minister subsequently confirmed that the joint scheme could be proceeded with as soon as the necessary improvements were effected at the Hodsocks Works. On this account no further progress was made until the year end. The Worksop Rural District Council then intimated that it would be safe for this Council to proceed with their portion of the joint scheme. It is anticipated that tenders for the work will be asked for in early 1961. The Council's decision to provide adequate sewerage facilities in Woodall was implemented. A tender price of £12,337 for the work was accepted in February and work commenced in July. The very wet summer and autumn season resulted in slow progress and much work was left to be done by the end of the year. During the year, a request was received from the Gildingwells Parish Meeting requesting that the possibility of providing a sewerage disposal scheme in this area be investigated by the District Council. The Council's Consulting Engineers were of the opinion that the scheme could be carried out, but only with great difficulty. Nothing was resolved by the year end and it is anticipated the Council will consider a report on drainage conditions in Gildingwells in 1961.

A limited amount of effluent from the East Midlands Gas Board plant in Rotherham Road, Dinnington, was received into the Dinnington Disposal Works. Samples of the final effluent brought no adverse comment from the Rivers Board and it was decided that the amount of effluent received from this plant could be increased further and samples could be taken. The experience of dealing with a greater flow of effluent from this plant would determine the Council's action in the future. However, it was realised that in any event, additional land would be required for an extension of the works and by the end of the year, the necessary acreage was purchased.

Number of houses connected to sewer	...	...	...	6,016

	lack of water facilities	...	169

Legal notices were served in respect of properties requiring conversion of earth closets in Woodall into water closets.

Water Supply

The summer and autumn of 1960 was as wet as the previous summer and autumn period had been dry. As a consequence, the embarrassment of a shortage of drinking water did not affect the Council during 1960.

The Council still continued to distribute water, but it is anticipated that the Sheffield Corporation will undertake this duty some time in 1961.

It was not possible to connect the remaining 8 farms and isolated cottages to the mains supply, but this number is extremely small when compared with the total number of houses in the District.

One private supply was examined during the year and two samples were taken for bacteriological examination. Both were found to be heavily polluted and grossly contaminated with mineral oil. The supply was used to augment the public supply in the preparation of malt. The maltsters were persuaded to discontinue the use of the private supply for this purpose and to use only the mains supply.

The following table shows the sources of the public supplies in the District:-

Water undertaker	Nature/origin of supply	Number of dwellings supplied
Sheffield Corporation	Upland Surface Water	6,418
Worksop R.D.C.	Bore-hole	2
Doncaster & Tickhill		
Water Board	-do-	4
Maltby U.D.C.	Upland Surface Water	2
		Total - 6,426

The number of samples of water taken were as follows:-

Supply	Plumbo-Solvency		Bacteriological	
	Sat.	Unsat.	Sat.	Unsat.
Public Supply	2	-	7	-
Private Supply	-	-	-	2
Total -	2	-	7	2

Housing

It was possible to do a limited amount of re-housing of tenants from condemned houses during the year and this consisted of a completion of the work commenced in late 1959. Ten families were re-housed at Harthill and North Anston and afterwards, it was possible to demolish some 17 properties. As a result, the Main Street, North Anston, and the Winney Hill, Firvale, Harthill Clearance Areas were cleared of buildings.

In February, there was a hearing held by an Inspector of the Ministry of Housing and Local Government on the Wales Bar Clearance Order. The result of the proceedings was that the Minister confirmed the Order in May.

This meant that there was some 56 slum dwellings in the Wales Parish, the occupants of which were requiring to be re-housed. After some considerable delay, arrangements were finally made for 56 new houses to be constructed at Red Hill, Kiveton Park. As soon as these houses are occupied, the Council's first five-year programme of slum clearance work will have been completed.

Towards the year end, the Council decided to embark upon a new programme of 44 houses which required demolition proceedings treatment. It was anticipated that all these properties would be treated as individually unfit houses and that there would be no clearance areas involved. During the year, 12 individual unfit houses were inspected and subjected to demolition order proceedings. A majority of these properties were at Firvale, Harthill, and as a result of previous action in this locality, the Council was faced with the difficult problem of rehousing at least 15 families in the Harthill Parish. No building land was available within the Parish and efforts to obtain land throughout the year were abortive.

Finally, mention should be made of a re-housing problem which the Council solved in co-operation with the East Midlands Gas Board. The occupants of 8 houses in Rotherham Road, Dinnington, complained of noise and fumes from the nearby plant owned by the Gas Board. The Board offered to purchase the houses if the Council agreed to re-house the occupants. The Council acquiesced and the Board agreed to pay a contribution towards the cost of the new buildings. By the end of the year, arrangements had been made to build 8 new houses on the High Nook Estate, Dinnington.

The following statistical information indicates the work of the Department during the year:-

No. of Demolition Orders made	...	...	...	...	...	11
" " Undertakings from owners accepted	...	...	...	...	...	1

New Dwellings

Number of new dwellings completed during the year:-

By the Council ... 40 By Private Enterprise ... 96

Grants for Improvement of Housing Accommodation

Formal Applications Received - 41	Applications Approved - 41	Number of dwellings completed - 37
-----------------------------------	----------------------------	------------------------------------

Advances for Acquiring Houses

41 Applications were received for advances under the Small Dwellings Acquisition and Housing Acts and approved. Of these, 7 were not proceeded with and in 29 cases the advance was paid.

Moveable Dwellings

During the early part of the year, trouble was experienced in dealing with itinerant van dwellers at North Anston. It was necessary to institute Court proceedings in one case and the prosecution was successful.

The Caravan Sites and Control of Development Act, 1960, came into force during the year and resulted in one application for a site licence. A site licence was granted for a period of twelve months in order to allow the occupant of the caravan to make arrangements for alternative accommodation. Towards the year end, the Council authorised proceedings to be instituted against another occupier of land who had failed to make application for a site licence.

Meat and Other Foods

Milk

Amendment in the legislation relating to the sale of designated milks resulted in the Council losing their powers of licensing of dealers in these foods. The West Riding County Council is now the licensing authority, but this Council still retains its power to register distribution of milk.

Before the new regulations came into force, the numbers of licensed dealers were as follows:-

<u>Designated Milk</u>	<u>Supplementary Licences</u>	<u>Dealers' Licences</u>
Tuberculin Tested	3	20
Pasteurised	3	21
Sterilised	2	25

Food Hygiene Regulations and Ice Cream

Most of the work under this heading consisted of routine visits to food premises. Generally, the standard of food handling is only fair in this District.

There are few examples where high priority attention is given to hygiene in food premises, but at the same time, there was no case of gross contamination during food handling.

The County Council was advised to improve the canteen facilities at the Dinnington Modern Secondary School. It was felt that the premises were too small to produce a large number of school meals.

The food premises in the area are as follows:-

Catering establishments	...	...	14
Bakehouses	...	...	3
Other Food shops	...	...	154
Sausages, Potted or Preserved Foods			15

There are 69 retailers of ice-cream whose premises are registered. There was no manufacture of ice-cream in the District during 1960 for the first time. Originally, there were 3 manufacturers, but increased production costs and a stringent set of regulations relating to the manufacture of ice-cream have made production uneconomical.

Details of ice-cream samples taken for bacteriological examination are as follows:-

<u>Sample No.</u>	<u>Type</u>	<u>Grading</u>
1/60	Heat treated. Opened from continuous freezer.	1
2/60	Heat treated. Wrapped unopened block from continuous freezer.	1
3/60	Heat treated.	1
4/60	Heat treated.	1
5/60	Unopened tub from continuous freezer.	1
6/60	Heat treated. Unopened tub from continuous freezer.	1

Meat and Meat Inspection

The numbers of pig and calf carcasses inspected during this year show an increase on the 1959. The figures in respect of bullocks, heifers, cows and sheep show a considerable decrease. The reason for the decrease was on account of a local wholesaler who closed his slaughterhouse and for the latter half of the year carried on his slaughtering business at the Rotherham Corporation abattoir. However, the Bacon Factory at Todwick continued daily slaughtering throughout the year and apart from very rare exceptions, the carcasses and offal had to be inspected outside normal office hours.

Following consultation with all the interested parties, the Council's Report of the Slaughtering Facilities in the district was sent to the Minister of Agriculture, Fisheries and Food.

The Report recommended that the 31st March, 1961, should be the date when the construction regulations should come into force in this District. Approval of the Report was received in June, but the application date was altered to 1st October, 1961. This alteration was made to allow sufficient time for an applicant for a new slaughterhouse licence to complete his new premises. Each person mentioned in the Report was notified of the Ministers' acceptance of the Report. The practical response to this has been negligible. No effort was made to improve any of the existing premises and at the year end, no plans had been submitted for new slaughterhouse development. It may be wrong to anticipate future events, but the present indications are that no existing slaughterhouse will comply with the Regulations by the appointed day and it is almost certain that neither of the two proposed slaughterhouses will be ready by then.

Number of slaughterhouses in the district 5

The number of carcasses inspected during the year are given in the table overleaf.

	Cattle excluding Cows	Cows	Calves	Sheep and Lambs	Pigs
Number killed	796	39	71	6,957	8,005
Number inspected	796	39	71	6,957	8,005
All diseases except Tuberculosis and Cysticercosis					
Whole carcasses condemned	-	1	1	4	4
Carcasses of which some part or organ was condemned	80	9	1	27	205
Percentage of the number inspected affected with disease other than tuberculosis and cysticercosis	10%	23.1%	1.4%	0.4%	2.56%
Tuberculosis only					
Whole carcass condemned	-	-	-	-	-
Carcasses of which some part or organ was condemned	8	-	-	-	134
Percentage of number inspected affected with tuberculosis	1%	-	-	-	1.67%
Cysticercosis					
Carcasses of which some part or organ was condemned	1	-	-	-	-
Carcasses submitted to treatment by refrigeration	1	-	-	-	-
Generalised and totally condemned	-	-	-	-	-

The disposal of condemned meat is by sterilisation or incineration.

Canned Foods

The following amount of canned foods were found to be unfit for human consumption and were surrendered for destruction.

194 tins Fruit	98 tins Tomatoes
13 tins Evaporated Milk	11 tins Soup
7 tins Peas	6 tins Rice Pudding
5 tins Salmon	3 tins Crab
3 tins Meat	2 tins Cream
1 tin Baked Beans	

89 tins Foreign Imported Canned Meats weighing 301½ lbs. were found to be unfit and were surrendered for destruction.

Other Foods

The following foodstuffs were found to be unfit for human consumption and were surrendered for destruction:-

29 lbs. Cod Fillets
14 lbs. Kippers
28 lbs. Currants

Rodent Control

The following table shows inspections and treatments carried out at various types of properties during the year:-

	Local Authority premises	Dwelling Houses including Council Houses	All other including business premises	Agri-cultural premises.
Total inspections carried out including re-inspections	75	425	130	290
No. of treatments for properties infected by				
(a) Rats	11	36	16	5
(b) Mice	-	6	6	-
Total treatments carried out including re-treatments	11	42	22	5

These figures do not show the work involved in the treatments carried out in the Council's sewer systems. The first maintenance treatment carried out in April and May showed only light infestations throughout the District. The second treatment six months later revealed a much heavier infestation, particularly at Dinnington. The second result was so surprising that a visit was received from the Ministry's technical officer, which resulted in a long discussion, including suggestions as to future techniques.

Storage of Petroleum Spirit

Most of the work under this heading took the form of inspection and testing of new installations and examination of electrical installations for compliance with the Home Office Code of Practice.

Towards the end of the year, the Fire Service undertook a complete survey of all existing installations, but a complete report of all premises was not received before the end of the year.

During the year, two licences were granted for new installations.

Public Cleansing Statistics

Collection of Refuse

The following amounts of refuse were collected from the various parishes during the year:-

<u>Parish</u>	<u>Dry Refuse</u>		<u>Wet Refuse</u>	
	<u>Lorry Loads</u>	<u>S.D. Loads</u>	<u>Lorry Loads</u>	<u>Tank Loads</u>
Anston	166	195	1	209
Dinnington St. John's	246	568	-	61

Red Hill	1,330	17	99	-
Farm Land	-	-	-	400
Totals -	1,867	783	99	515

Remarks

There was no change in the numbers of staff and vehicles employed in the collection of refuse. Trade refuse was collected from 19 premises at an annual charge of £1. 0. 0. each.

Following a report on the condition of the present fleet of vehicles, the Council decided to have a demonstration of a large vehicle in the Wales Parish and surrounding areas. The large vehicle proved to be capable of negotiating all the back streets in the demonstration area and as a result, the Council decided to purchase a new vehicle. Delivery is expected in June 1961. A reasonable frequency of collection was maintained throughout the year despite the very wet conditions experienced during the latter half of the year. It proved to be more difficult to maintain a frequent cesspool emptying service and both the frequency and the method of collection received criticism. The Council decided that despite the new sewerage schemes which were envisaged, the number of cesspools was large enough to justify the purchase of a properly equipped cesspool-emptying vehicle. It is anticipated that an order will be placed for this machine some time in 1961.

The main centres of disposal were at Quarry Lane, North Anston, and Red Hill, Kiveton Park. Refuse was disposed of by the controlled method, but despite all precautions, both refuse tips were continually on fire. These conditions will continue until the Council decide to purchase suitable earth moving equipment for consolidating refuse.

An access was made into the new refuse tip at Kiveton Park Station and at the year end arrangements were in hand for the construction of a road from the access to the tipping area.

The small quarry on Rackford Road was brought into use for disposal purposes towards the year end.

Factories Acts, 1937 - 1959.

Changes in the legislation relating to adequate means of escape in case of fire resulted in the duties of local authorities in this matter being transferred to the local fire authority. The records relating to means of escape in case of fire were passed to the fire authority at the year end.

Details of inspections in factories are as follows:-

Premises	Number on Register	Number of: Inspections Written Notices		Occupiers prosecuted
1. Factories in which Sections 1, 2, 3, 4 & 6 are enforced by Local Authorities	4	10	-	-
